

## Adult SpO2 Probe Sensor

To collocate with patient monitor and pulse oximeter, Resptech offers a wide range of very durable and reusable probe sensors for continuous, non-invasive measurement of arterial oxygen saturation. Each sensor has been conducted strict quality inspection and ensures its accuracy. Every sensor is easy to apply and designed with user-friendly. To be compatible with different brand technology, Resptech provides versatile probe sensors for selection. Adult probe is comfort and secure fit with minimal pressure. It's suitable for the Operating Room, Recovery Room, Intensive Care Unit and Wards.

### Features:

- Comfortable fit for continuous monitoring
- Accurate and dependable oxygen saturation reading
- Easy for clean and it's durable design
- Self-aligning grip and secure use

- 12-Month guarantee

### RT101 / Nellcor Compatible

- > Plug type: DB9 pin
- > Cable length: 1.0 m
- > Latex Free
- > Compatible: Nellcor, Colin, Datascope (S&W), Drager, Fukuda Dens
- > Finger clip SpO2 probe sensor for Adult
- > Available weight upon 40 Kgs

### RT102 Nellcor Oximex compatible

### RT103 Nellcor compatible (Disposable)

### RT201 BCI Compatible

- > Plug type: DB9 pin
- > Cable length: 1.0 M

### RT301 Philips Compatible

- > Plug type: 8 pin
- > Cable length: 1.0 M

### RT401 Nonin Compatible

- > Plug type: DB9 pin
- > Cable length: 1.0 M

### RT501 Novamatrix Compatible

- > Plug type: 6 pin
- > Cable length: 1.0 M

### RT601 Ohmeda Compatible

- > Plug type: 7 pin
- > Cable length: 1.0 M
